Plastic Surgery

Women Understand Women

Founded with their belief that women really do understand women, the Women's Institute strives to offer the best in time tested cosmetic and laser surgical options available today with the pursuit of uncompromising quality of care. Featuring an all female physician staff of ABPS Board Certified plastic surgeons, the Women's Institutes physicians are committed to determining the individual needs of women and fulfilling them with the most realistic, safest and least invasive methods possible.

The Women's Institutes founder Dr. Jennifer Hein, her partner Dr. Ann Marx and the staff at Women's Institute are devoted to quality of care. They believe that all consults, from the initial, to operative, to post-operative, should be done with the same physician. The experience and expertise of Dr. Hein and Dr. Marx combined with the natural, beautiful results they help patients achieve has earned Women's Institute the recognition of being one of the country's leading plastic surgery groups.

Natural results are the specialty of the Women's Institute. As Dr. Hein states, "Our greatest compliment following surgery is when patients tell us their friends noticed their incredible new look, but weren't able to pinpoint what exactly is different. We strive for natural looking results that help build self-confidence, not the "operated" look that can make women feel self conscious."

The Women's Institute features an in-office state-of-the-art Accreditation Association for Ambulatory Health Care (AAAHC) accredited operating facility. The Institute offers a full range of plastic surgery procedures including: Liposuction/Liposculpture, Breast Augmentation, Breast Reduction, Facelift, Total Patient Care, Abdominoplasty, Breast Reduction/Mammoplasty, Rhinoplasty, Eyelid Surgery/Blepharoplasty and much more.

When it comes to Botox® the Women's Institute is one of the small percentage of offices that has achieved the Botox® Platinum status. The Institute also offers a full range of cosmetic fillers including; Juvéderm™ Ultra+, Radiesse™, Restylane®, and many more.

The Women's Institute features state-of-the-art Laser equipment from Elos. Laser Procedures include: Hair Removal, ReFirme Skin Tightening, Vein Reduction, Fotofacial Skin Rejuvenation, Acne Reduction and more. The Women's Institute only uses Registered Nurses or Plastic Surgeons for all of its Laser Procedures. Before having laser or any other procedure done, the Women's Institute recommends asking who's doing the procedure and what their medical background is.

Things the Women's Institute does not offer are; Mesotherapy, miracle weight loss injections, the latest fad procedures with little to no science to back them up and other items the Institute does not believe in or feel are safe in the long term for patients.

The Women's Institute offers some of the most competitive prices in Chicagoland with the convenience of multiple Chicagoland locations. To schedule a consultation, call us at 800-Defy-Age (800-333-9243) or visit us on the web at www.DefyAge.com. **For unadvertised specials and to join the Women's Institute's private mailing list send an email to info@defyage.com requesting to join.**
